

Corner Pads, Sweeps, and EZ Pads

Extra protection against nature's fury

Help thresholds and astragals reach their maximum potential with Quanex's weather sealing solutions for doors that are designed to combat the straw effect during high-wind or stormy conditions.

All of the company's weather sealing products – Leading Edge™ Corner Pads, 2² Sweeps and EZ Pad Sweep Pads – are specially engineered to equalize pressure on the door system to keep air and water out, regardless of the weather. Installation is simplified because of Quanex's thoughtful engineering and advanced technologies.

Leading Edge™ Corner Pads

Quanex's Patented Leading Edge Corner Pads, are effective against the straw effect, creating equilibrium in the door system. And, where competitive products can compromise the effectiveness of the weather strip, Leading Edge Corner Pads are guaranteed not to cause crimping and allow for proper orientation of the weather strip. *United States Patent No. 8,240,090.*

2² Sweeps

Maintain maximum surface-area contact to the threshold rail with Quanex's 2² Sweeps, which consistently outperform competitive products because of the reversible, two-bubble design, which encapsulates the outside and inside edges of the rail. Two fins then fit in between the rail, creating an ideal amount of space to easily add a three-point locking mechanism without having to cut or compromise weather-sealing products.

EZ Pads

Typically the top end of the sweep is the most difficult area to seal - but with the EZ Pad, sweep installation and water-tight sealing has never been easier. Simply peel the backing tape to reveal a heavy-duty adhesive system that can be placed using a mallet.

Quanex Building Products offers a complete suite of high-performance door products, including Imperial thresholds, astragals, weather seals, door jambs and multipoint locks that are designed to provide simplicity, improve energy performance and reduce or eliminate air and water infiltration.

2² Sweep

EZ Pad

- Sold Loose
- Sold installed on sweep
- Seals most difficult area to seal and does so without caulk
- Easy-to-use
- Saves two steps of labor
