- Product differentiation helps capture market share
- In-line application saves time and cost

SPECIES

Quanex Real Wood Veneers are available in three highly popular and distinctive species that accommodate a wide range of interior home decors:

DIFFERENTIATE... WITH REAL WOOD VENEERS

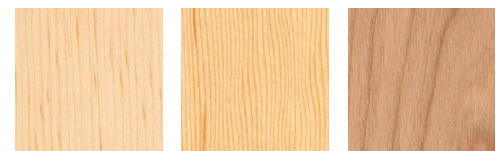

Why settle for plain color profiles when you can provide products with Real Wood Veneer finishes? More than ever modern day customers are expecting products that are not only functional, but aesthetically appealing too. Product differentiation is increasingly becoming the model for acquiring new customers. Real Wood Veneer products can improve the overall appearance of your window, giving you an edge against the competition.

THE FINISH THAT NATURE INTENDED

Quanex now provides the option to use genuine Real Wood Veneers for interior surface application on high-end window and door systems. Our veneers display the real beauty, texture and consistent look of wood, without diminishing natural wood resources.

LASTING BEAUTY

Quanex Real Wood Veneers can be finished just like solid wood. Unlike wood, our veneers will be free of knots and will not split or warp. Additionally, the veneers provide a consistent look and are applied to the profile in a manner that assures long-lasting beauty and durability.
